

protect

moms & babies

In some countries, people don't have the **vaccines** or health education that help prevent disease. That's why many **babies** in those countries get infected with **tetanus** when they're born. The Kiwanis family—including K-Kids—is helping to **protect** those babies and their **mothers**.

The **Eliminate** Project: Kiwanis eliminating maternal and **neonatal** tetanus is a partnership between **UNICEF** and **Kiwanis**. By joining forces, we'll make progress toward an important goal: eliminating MNT from the face of the Earth.

The **fundraising** campaign will raise US\$110 million by 2015. And K-Kids can help. Talk to your advisor about how your club can get involved. Learn about MNT and what we can do about it. Help protect the **connection** between mothers and their babies.
